

Aarly Anglish Mantelpieres

TODHUNTER

119 East 57th Street · N.Y. CITY

N view of the present trend toward the Early English in domestic architecture, this catalogue has been designed to assist in planning a home of this type.

We have illustrated a number of different treatments for the fireplace; the very early and simple oak beam or hearth-tree, as it was called, as well as the elaborately carved stone and wood mantels of the period, some with overmantels, selecting such interesting examples as are well adapted to present day conditions.

In these stone replicas, moulded direct from the originals, has been preserved all the character of surface and perfection of detail of the work of the early master craftsmen, as well as that quality which contributes so much to the charm of the old work—the delightful mellow tone of age.

Where a small fire opening is required the mantel illustrated below and those on pages 13 and 14, are suitable. The plain facing shown in the mantel on page 12 illustrates how the size of the fireplace opening may be reduced, without altering the mantel.

The sizes given under the illustrations are the desirable standards, but the height of stone mantels and facings can be reduced where conditions make it necessary.

No. 9655 Moulded stone in antique finish. Suitable for use where the size of flue does not permit of a larger fire opening. Shelf 4' 8" wide x 4' 0" high. Body width 4' 23/4". Fire opening 3' 0" wide x 2' 6" high.

HAND CARVED OAK BEAMS

Executed in the manner of the early work, in a waxed antique finish. These beams are made $1\frac{1}{2}$ " thick, so as to set into the wall without special construction. A facing of moulded stone, as shown below, is used to frame the fireplace opening.

Can be made to any special design and size.

No. 9647 Carved oak beam with antique wax finish, 4' o" wide x 8" high at centre x 1½" thick. Moulded stone facing—outside 3' 4½" wide x 2' 8¼" high, inside 3' o" wide x 2' 6" high. Can be made to any

No. 9642 Moulded stone. Lintel 5' 1" wide x 4' $7\frac{1}{2}$ " high. Opening 4' 1" wide x 3' $7\frac{1}{2}$ " high at point of arch, 3' $4\frac{1}{2}$ " to spring of arch. Body width 5' $10\frac{1}{2}$ ".

No. 9646 Carved oak beam lintel, with moulded stone jambs. A very early type. Outside sizes 7' 3" wide x 5' 6½" high. Opening 6' 0" wide x 4' 9" high.

No. 9659 An excellent example of a XV Century fireplace. Carved oak lintel supported on stone blocks in antique finish. Beam 8' o'' long x 5' 2½" high. The stones are from 8" to 12" from front to back. We would suggest the use of broken flagstones for front hearth.

9660 The advantage of this fireplace is that the projection of the lintel provides a space for the display of pewter, etc., while retaining the effect of a beam mantel. Carved oak, with moulded stone facing, in antique finish. Lintel 7'0' wide x 5'2½" high. Body width 7'0'. Wood opening 5'6' wide x 4'6" high. Fire opening 4'10½" wide x 3'7' high at center, 3'2½" at spring of arch. No.
